I'm a web developer who builds fast and responsive websites using modern tools like Next.js, headless WordPress, and GSAP animations. I care deeply about website speed, user experience, and creating frontends that are easy to maintain and scale.

Experience

Web Developer | Greydient Lab
October 2024 - Present

- Explored different ways for building website such as Framer for no code, headless CMS for better flexibility and others.
- Created a Unity-based game designed to run in a web browser.
- Helped clients to improved their website by reducing file sizes, using caching, and cleaning up the code.
- Created a webapp using Next.js.

Junior Front End Developer | Greydient Lab
May 2023 - October 2024

- Developed custom theme template using ACF Pro in Wordpress.
- Worked closely with developer to make sure that all of the codes are clean, organized and structured.
- Worked closely with designers and team members to understand the designs made in Figma and what the project needs.
- Added interactive features and dynamic content using JavaScript and any needed tools or frameworks.

Front End Develeoper Intern | Greydient Lab
January 2023 - April 2023

- Translated UI/UX design to actual front-end development.
- Built reusable components and libraries to accelerate development..
- Optimized application for maximum speed and scalability for the project.
- Provided post-launch support for any bug or technical fixes.

Projects

Loby
Role: Web Developer

Tech Stack : WordPress (Headless CMS), Tailwind
- Developed a fully responsive single-page website using Next.js and a WordPress headless CMS.
- Integrated Contact Form 7 (CF7) for form handling.
- Implemented custom animations, transitions, and macro-transitions in alignment with the designer's specifications.

Learning By Design
Role: Web Developer

Tech Stack : WordPress, Tailwind, GSAP,
- Collaborated with senior developers to implement advanced animations and transitions using GSAP, following precise design specifications.
